Waterbased Flexo Coatings

All our high quality water based coatings are designed to offer good block resistance combined with excellent drying characteristics and rub-resistance:

- **Galaxy Flexo WB-F850 Gloss Emulsion**
Economic gloss protection coating.
- **Galaxy Flexo WB-F870 Fast Gloss**
Very fast drying gloss protective coating.
- **Galaxy Flexo WB-F900 Satin Emulsion**
Satin finish.
- **Galaxy Flexo WB-F910 Matt Emulsion**
Matt Finish.
- **Galaxy Flexo WB-F950 Hi-Slip Emulsion**
Provides the surface with a high slip finish.
- **Galaxy Flexo WB-F980 Heat Resist Emulsion**
Gloss heat resist coating with heat resist up till 270°C. Thermal paper.
- **Galaxy Flexo WB-F995 Pre Print Flexo**
Protective gloss coating before corrugating.

UV Flexo Inks

Galaxy UV Flexo Ink

High quality, high gloss free radical UV ink system. The Galaxy UV Flexo Ink range has been developed to provide good colour strength, gloss and fast cure performance on a wide range of substrates. Suitable for a wide variety of applications.

- Very good adhesion
- Excellent curing properties
- Very Good Gloss
- Low Odour
- Excellent Rub Resistance
- Excellent Printability

Available: Process inks, PANTONE® Base inks and special colours.

- Also available **Galaxy LM UV Flexo inks**

Available: Process inks, PANTONE® Base inks and special colours.

UV Flexo Coatings

To complement our range of **UV Flexo Inks** we offer a comprehensive range of **UV varnishes**.

- **Galaxy Flexo UV-F2000 Hi Gloss UV**
Fast curing gloss UV with good adhesion to paper, board and films (specific films to be tested).
- **Galaxy Flexo UV-F2020 Hi Gloss UV FB**
Fast curing gloss UV for foil blocking, suited for paper, board and films (specific films to be tested).
- **Galaxy Flexo UV-F2080 Matt UV**
Very stable and fast curing matt UV. Suitable for paper, board and films (specific films to be tested).
- **Galaxy Flexo UV-F2100 Hi Gloss LowM**
Low migration gloss UV, complies with Nestle and EuPIA.
- **Galaxy Flexo UV-F2120 Hi Gloss LowM FB**
Like UV-F2100 but foil blockable.
- **Galaxy Flexo UV-F2140 Hi Gloss LED**
Non yellowing gloss UV for curing with LED lamps.

Flexo Washes

- **Galaxy FlexoWash WB**
Very strong concentrated wash can be diluted up to 10:1 depending on the degree of cleaning required. Corrosion inhibited.
- **Galaxy Flexo Solution**
Concentrated general purpose cleaner for water based flexo inks using safe detergents & cleaning agents. Can be diluted 10:1.

Solvent Based Washes

- **Galaxy FlexoWash Combi**
General purpose cleaner for UV and solvent based flexo inks. Non flammable and non hazardous for supply and handling.
- **Galaxy FlexoWash UV**
As above but flammable and so faster evaporating for quicker turn round times.

Universal Products

- **Galaxy Anilox Roller Gel**
Viscous formula to prolong contact with surfaces and facilitate penetrative cleaning of all flexographic inks and coatings from anilox rollers. Suitable for water based and UV flexo.
- **Galaxy Ultrasonic Bath Solution**
Very strong cleaner concentrate for UV and water based flexo inks. Especially suited to Ultrasonic cleaning baths. Gard Ultrasonic Cleaner can be diluted up to 10:1 depending on degree of soiling.
